

MASKALENCHIK VLAS

FRONT-END DEVELOPER

ABOUT ME

Hi, my name is Vlas, I position myself as a front-end developer. I have experience creating SPA with React / Redux / TypeScript. Every day I improve my skills and learn new technologies. Now I am improving my skills in this direction and expanding them with new technologies. I try to solve a couple of problems a week on Codewars also improve my English every day. I'm planning to study Node.js because my next focus is to become a Full-Stack Developer. Open for your suggestions

MINSK, BELARUS

EXPERIENCE - 2021-2022 FRONT-END DEVELOPER, FREELANCE

I written projects using technologies such as Redux, ReduxThunk, Axios, JavaScript, HTML, StyledComponents, HookForm, Material UI, etc. I wrote each project on TypeScript. TypeScript helped write correct code and find errors early. I tested projects using libraries such as Jest, StoryBook snapshot. Testing library. I have experience in joint development with people from the course. To distribute tasks, we used Jira. For the control version we used Git. I have experience in development in a startup in Sacral Projects LLP
